

JINDAL DIAGNOSTIC CENTRE

Ram Nagar, National Highway, KALKA Tel : 8950041002

Dr. Mukesh Jindal

M.D. Radiodiagnosis
Family Doctor, Resident FGL CH

Timings :
9:00 am to 5:00 pm
Sunday
9:00 am to 1:00 pm

Dr. Ruchika J

MBS, DMRD, Radiologist
Family at GAG

Name: Mrs. MANJESH

Age: 42 Yr.

Sex: F

Date: 6-Sep-19

ULTRASOUND ABDOMEN AND PELVIS (TVS):

LIVER: is normal in size, outline and echotexture. No focal area of abnormal echo texture is seen. Hepatic veins are normal in caliber and show anechoic lumen. No dilatation of intrahepatic biliary radicles is seen. Portal vein is normal in calibre and measure 8 mm at porta. No evidence of any echogenic thrombus is seen.

GALL BLADDER: is distended and shows a single calculus in its lumen measuring 20 mm in size. Its wall thickness is normal. No biliary sludge or soft tissue mass is seen. No pericholecystic lucency is seen. U/S murphy's sign is absent.

COMMON BILE DUCT: is normal in calibre and outline measuring 3 mm at the level of port a hepatis.

PANCREAS: is normal in size, outline and echotexture. Pancreatic duct is not dilated. No intra or peripancreatic collection is noted.

SPLEEN: is normal in size, outline and echotexture. No focal lesion is seen.

KIDNEYS: are normal in shape, size and echo texture. Both sides show normal pelvicalyceal systems. No evidence of any calculus or hydronephrosis is noted on either side. CM differentiation is preserved bilaterally. Sinus fat echoes are normal bilaterally.

PERITONEUM and RETROPERITONEUM: No free fluid is noted in abdomen and pelvis. No evidence of abnormal lymphadenopathy is noted in retroperitoneal region. No e/o dilatation of bowel loops is seen. No e/o any mass is seen in RT. iliac fosa.

URINARY BLADDER: is normally distended and normal. No abnormal intraluminal echo is noted.

UTERUS: is anteverted, normal in size, outline and echotexture. No hypo/hyper focal lesion is seen in and anterior and posterior walls. Endometrial lining is central in location measuring 8.4 mm. Cervical echocomplex is normal. Cervical lips are well outlined. No focal lesion of abnormal echotexture is seen. Vagina is normal.

OVARIES: Both ovaries are normal in size and echotexture. Stroma is central & normal. Few small follicles are seen in both ovaries.

A tubular cystic anechoic lesion measuring 5 mm in diameter is seen in Lt. adnexal region s/o hydrosalpinx.

No e/o PCOD is seen. No free fluid is seen in the POD.

IMP: CHOLELITHIASIS
HYDROSALPINX LT. SIDE
