ULTRASOUND SCAN OF WHOLE ABDOMEN

LIVER: Liver is mildly enlarged in size (15.0 cm) & shows diffuse increase in echogenicity S/o Fatty infiltration of Liver. The intrahepatic biliary radicles are not dilated. No evidence of any focal lesion is seen. Portal vein is within normal limits.

GALL BLADDER: Gall bladder is well distended and shows anechoic lumen with smooth and regular walls. No evidence of any mass or calculus seen. No pericholecystic fluid collection noted. CBD - Normal in course and caliber.

PANCREAS: is normal in size, shape & appearance. No calcification or focal lesion is seen. No Peripancreatic fluid collection is seen. Pancreatic duct is not dilated.

SPLEEN: is normal in size, shape and echotexture. No focal lesion seen. No retroperitoneal lymphadenopathy seen.

KIDNEYS:

Right kidney measures 9.1 cm in length with parenchymal thickness of 11 mm.

Rt. Kidney is normal in size, shape, cortical echogenicity and location. No dilatation of pelvicalyceal system is seen. No definite calculus seen. Cortico-medullary differentiation is maintained. No perirenal abnormality seen.

Left kidney measures 10.4 cm in length with parenchymal thickness of 12 mm.

Lt. Kidney is normal in size, shape, cortical echogenicity and location. No dilatation of pelvicalyceal system is seen. No definite calculus seen. Cortico-medullary differentiation is maintained. No perirenal abnormality seen.

URINARY BLADDER: Appears well distended with a normal anechoic pattern and smooth/regular walls. No evidence of any calculi or mass lesion could be seen within the bladder or at UV junctions.

PROSTATE

Prostate is normal in size (measures 20.5 cc in volume), shape and echotexture. No obvious focal lesion seen.

No free fluid seen in abdomen & pelvis.

**IMPRESSION: Mild Hepatomegaly with Grade II Fatty Liver.
Suggest correlation with LFT.**

ULTRASOUND SCAN OF WHOLE ABDOMEN (DUPLICATE)

LIVER: Liver is normal in size (**13.5 cm**), shape and echotexture. The intrahepatic biliary radicles are not dilated. No evidence of any focal lesion is seen. Portal vein is within normal limits.

GALL BLADDER: Gall bladder is well distended and shows anechoic lumen with smooth and regular walls. No evidence of any mass or calculus seen. No pericholecystic fluid collection noted.
CBD – Normal in course and caliber.

PANCREAS: is normal in size, shape & appearance. No calcification or focal lesion is seen. No Peripancreatic fluid collection is seen. Pancreatic duct is not dilated.

SPLEEN: is normal in size, shape and echotexture. No focal lesion seen. No retroperitoneal lymphadenopathy seen.

KIDNEYS:

Right kidney measures 10.1 cm in length with parenchymal thickness of 13 mm.

Rt. Kidney is normal in size, shape, cortical echogenecity and location. No dilatation of pelvi-calyceal system is seen. No definite calculus seen. Cortico-medullary differentiation is maintained. No perirenal abnormality seen.

Left kidney measures 10.1 cm in length with parenchymal thickness of 12 mm.

Lt. Kidney is normal in size, shape, cortical echogenecity and location. No dilatation of pelvi-calyceal system is seen. No definite calculus seen. Cortico-medullary differentiation is maintained. No perirenal abnormality seen.

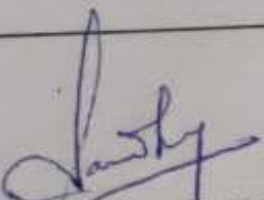

URINARY BLADDER: Appears well distended with a normal anechoic pattern and smooth/regular walls. No evidence of any calculi or mass lesion could be seen within the bladder or at UV junctions.

PROSTATE

Prostate is normal in size (measures 17.2 cc in volume), shape and echotexture. No obvious focal lesion seen.

No free fluid seen in abdomen & pelvis.

IMPRESSION: Normal ultrasound of whole abdomen.
